

Joshua Pace

Software Engineer

Former teacher turned software engineer intent on ever growing and learning. Experienced in JavaScript ES6 along with React/Redux, Angular, and Node. I’m a hard worker that deeply values interpersonal relationships and seeks to build people up. I have excellent communication skills and think outside of the box to develop creative ways to get things done; I am a natural problem solver.

Experience

2017 - present	Contract Software Engineer <i>Civility International</i> <ul style="list-style-type: none">• Collaborate with design team to create pixel perfect views from wireframes in Angular 5• Improved dev team efficiency using Git and Bitbucket for version control• Utilized public APIs such as Mailgun in both the frontend and Node.js backend• Expanded Stripe payment gateway into new pages allowing users to pay for services• Proved to be a reliable remote team member in writing concise and readable code
----------------	---

Applications

2017	Polished <i>Open source mobile app connecting users to on-demand nail artists in their local area</i> <ul style="list-style-type: none">• Transformed wireframes into a responsive mobile UI with Angular 2, Ionic 2, and SCSS• Instituted Braintree API payment gateway for secure and low cost payment processing• Designed server-side web-scraper to verify submitted license numbers on breeze.gov• Built REST API using Node/Express saving data with Sequelize to PostgreSQL database• Deployed on Amazon Web Services EC2 instance for scalable computing capacity• Earned peer praise as scrum master, oversaw Git workflow and iterative Agile methods
2016	RecommendME <i>Open source app for location based lifestyle and food suggestions using the Yelp API</i> <ul style="list-style-type: none">• Improved rendering speeds and component reusability with React• Constructed a NoSQL database schema with Mongoose / MongoDB• Integrated Material-UI for a seamless and interactive UI/UX along with SCSS• Deployed on Heroku for ease of use and quick redeployment• Built RESTful API using Node/Express for speed and non-blocking I/O
2016	Point Blank <i>Open source app that crowdsources public opinion on today's most influential figures.</i> <ul style="list-style-type: none">• Upgraded existing form submissions in AngularJS to add personal experiences• Integrated personalization with Facebook SDK for efficient access to user-generated content• Utilized Angular-xeditable library to transform submissions into editable text areas in UI

Education

2017	Hack Reactor Advanced Software Engineering Immersive Program
2005	Biola University, M.A. Applied Linguistics
2001	North Greenville University, B.A. Philosophy / Foreign Languages
